## Testimonials

This has been one of the best selling landscape professional tools we have ever carried. It is so diversified with attachments for multi use, and very reasonably priced for a complete package. Most of the Landscape contractors buy the complete set, not just one or two pieces. If you are looking for a tool to save your company money, labor, or work comp claims, then this is the tool for you.

President—Central Landscape Supply, Inc.

As many have experienced the art of installing walls and steps with forks, reworking the base or product due to fork damage, we were very interested in this tool and decided to purchase the EZ-Set. It has not let us down. The EZ-Set has allowed us to increase production without hiring additional labor and delivering a better product to our customers. We now have the ability to spin the product that we are installing, and have improved the structural and visual appearance of our walls and steps. Another great aspect of the EZ-Set tool is that it self levels itself with the skid at any (safe) angle, allowing us to build level outcroppings, steps, walls, bridges, etc. without bringing in additional equipment, making those tough areas much more manageable. We here at PepperBerry Gardens highly recommend the EZ-Set to anyone who would like to deliver a better product to their customer.

Owner—PepperBerry Gardens, LLC.

"What an amazing tool. When it arrived we were pleasantly surprised at how rugged the EZ-Set was. It was also very easy to assembly with our equipment. Even with hydraulic thumbs on our excavators the EZ-Set is great for wall building and setting boulders for ponds because you can spin them 360 degrees and they don't mark them up. For setting granite steps it is hands down the best. The EZ-Set is a must have tool for the landscape contractor or mason."

I walked by the EZ SET Multi Purpose placing tool for over a year at my local landscape supplier. My sales person finally said John you have 17 steps to install, take the EZ SET with you and give it a try" So I did. My crew installed all 17 slab steps that where 18" x 48" x 7" weighing more than 500 lbs each by noon. I was amazed!! This aspect of installation I would usually estimate a full day with my crew. The EZ SET saved our crew over 50% of the time other methods of install take. This tool paid for itself by lunch time the same day I took it with me. Needless to say I did not return the EZ SET, and I have since added additional lifting plates. We now virtually use the EZ SET every day for one thing or another. Why I just walked by this amazing tool for over a year I will never understand.

*John A. Richards III* Owner—Treescapes Minneapolis, MN 952-947-0127

6,879 Square foot paver driveway in 5 days with a crew of 4. This was by far the largest paver project we had contracted! When we pulled up to the project our crew was overwhelmed by the 80+ pallets of pavers sitting there waiting to be installed. Before we started this project we contacted Steve Hrkal at EZ SET and a former landscape contractor himself to get more information on the EZ SET and the paver band lifting plates. Steve was adamant on how well the EZ SET would work for us.

We trained our crew on how to use the EZ SET; this only took minutes, "It is so easy". We then went to work on the install, 5 days later the project was complete. 6,879 square feet in 5 days, no overtime. We used the ES-3000 frame with paver band lift plates as well as the Bull Dog and Quick Hook. We found that we could lift 2 bands at a time, as well as a complete cubes with our larger loader. WE INSTALLED THIS PROJECT IN 45% LESS TIME THAN WE ESTIMATED THANKS TO THE EZ SET! Our trailer now does not leave our shop without the EZ SET and all the lifting plates.

When Steve brought the EZ SET with the boulder attachments coupled with the Bull Dog and Quick hook for our display, he simply plucked the 36" boulder out of the back of the truck with ease. For over a year I was aware of the EZ SET line and finally we have become a dealer for the EZ SET. I was amazed at how well it worked! If I did not see it with my own eyes I would not have believed it. The EZ SET is so simple to use and at the price point that won't break the bank; every one of our landscape customers will need an EZ SET.
